Bachelor's Degree in Management Information Systems, Faculty of Business

Alexandria University – Graduated with Excellent Grade (2025)

GPA : 3.7

PROJECTS

- **Islamic Web Platform (Methaq)**

Developed a comprehensive Islamic web application that provides multiple religious utilities within one platform.

-tech tools: React.js, Axios, Moment.js, HTML5 Geolocation API, CSS Modules.

-prayer times: Integrated the Aladhan API to fetch accurate prayer timings based on the selected country and city, including a live countdown timer for the next prayer.

-qibla direction: Implemented a real-time compass using the device's orientation and geolocation features to determine the Qibla direction accurately.

-zakat calculator: Built dynamic calculators for different types of Zakat such as money, gold, silver, and trade goods, featuring real-time input validation and Nisab thresholds.

-digital tasbeeh: Created a digital Misbaha (counter) that allows users to easily track and reset their Dhikr for a smoother spiritual experience.

- **Product Management System**
Developed a web-based system designed to simplify product pricing and management processes.
-tech tools: HTML, CSS, JavaScript.
-core features: Built functionality to calculate product prices dynamically, including tax and advertisement costs, ensuring accurate and real-time total pricing updates.
-user experience: Designed a clean and intuitive interface that helps users easily add, edit, and manage product data with smooth interactions and responsive layout.
- **Quiz app**
Developed an interactive quiz platform where users can select a category, difficulty level, and number of questions before starting the quiz. The app dynamically fetches questions from an external API and provides real-time feedback and score tracking. Implemented features include quiz history tracking, custom validation for user input, and state management using Zustand. - Technologies used: React, React Router, Zustand, Axios, HTML5, CSS3, and the Open Trivia DB API.
